The image shows a terminal window within a virtual machine environment. The window has a title bar with tabs for 'kali-linux-2025.3-vmware-...' and 'hackathon.1'. The terminal displays a sequence of commands and their outputs, numbered 160 through 188. The commands include privilege escalation attempts using 'sudo', system management commands like 'reboot', file system exploration with 'ls', password management with 'passwd', and system information gathering with 'whoami' and 'history'. The terminal output shows successful execution of several 'sudo' commands, resulting in root access, and the execution of 'reboot'. The window also features a menu bar with 'Session', 'Actions', 'Edit', 'View', and 'Help', and a status bar at the bottom with system icons and a prompt to move the mouse pointer inside or press Ctrl+G.
